ALLEGRO INTRODUCES EZ AIR POWERED AIR PURIFYING RESPIRATOR (PAPR) AS A COMPLETE SYSTEM FOR ULTIMATE WORKER PROTECTION

PIEDMONT, SC – Workers will experience more comfort, less fatigue and improved productivity with the Allegro EZ AIR PAPR complete particulate system intended for industrial applications where respiratory, eye and face protection is required. The System features a motorized, Lithium-ion battery operating system that supplies a constant supply of fresh, filtered air over the user's face. At an APF level of 25, it creates optimal protective pressure inside the respirator head top keeping away harmful gases, vapors, particulates and fumes. Recommended applications are welding, assembly, facility maintenance, grinding, machine operations, painting and sanding.

The Allegro EZ Air Deluxe PAPR System includes: a Welding Shield made of Dupont super tough, flame retardant Nylon that withstands extreme cold and heat, can accommodate safety glasses, and comes equipped with the 9935-X81V ADF lens that is ANSI and CSA approved; a flame retardant shroud that covers the user's ears, neck and back of head to prevent arc burns; a flexible 30" breathing tube with quick disconnect and FR cover; a Blower assembly with eight airflow settings, audible, visual and vibration alarms; a convenient single replacement NIOSH approved HEPA filter which filters 99.97% particulates; an adjustable and lightweight FR belt; a Battery Charger and Lithium-ion rechargeable battery with up to eight hours usage; and a Storage bag. Complete assembly weighs under 5 pounds.

The Allegro EZ Air Economy PAPR System includes all of the features of the Deluxe System but offers an ANSI and CSA approved 9935-X54V ADF lens that offers UV/1R protection up to shade 16 with permanent outer coating to protect eyes. Both systems come with a 3 year warranty.

Accessory items for both helmets include Helmet Decals to customize the Welding Shield for a personal, unique look and Magnifier Lens (Diopters) for Shields. These magnifier lenses have a built-in magnifier lens holder. Simply slide the magnifying lens into the holder and it's ready to use. Available in 4 different magnification strengths.
